

LED GRID PANEL

Lumens Depot Foam's LED Geometric Grid Panels deliver uniform illumination with superior energy efficiency, making them an excellent replacement for traditional T5, T8, or T12 fluorescent troffers. Designed with a high-quality diffusing lens, they provide bright, even light distribution for enhanced visual comfort. With adjustable wattage and selectable CCT options, these panels offer flexibility to meet the specific lighting needs of various environments. Their modern geometric design integrates seamlessly with architectural ceilings, creating a clean and sophisticated lighting aesthetic. Ideal for corporate offices, healthcare facilities, educational institutions, and other commercial spaces, these panels combine style with performance. The ultra-lightweight construction ensures easy installation while maintaining long-lasting durability and reliability.

Installation

INSTALLATION INSTRUCTION

Step 1: Make sure of all the power is off before installing. Remove the one ceiling tile that you need to install light fixture on. Then place the light fixture on the T-bar carefully and make sure it is correctly in place and secure.

Step 2: Place the driver on top of the next ceiling tile. Connect the cable between the driver and the lighting fixture.

Step 3: Open the driver's junction box and connect the AC wire to the driver correctly (L=black & N=white)

Warning:

Ensure the power supply has been cut off before connecting the wire, and all wiring and installation of this product are required to be operated by professionals.
